

# TARIFF PICTURES.

The purpose of the Tariff Reform Club is to bring a deluge of paper money into this country. For example, its latest prepared tariff bill would increase imports of wool manufactures from \$35,793,400 to \$70,000,000.

the first year after its enactment. The bill does not inform the working people employed in this industry where they are to find work when the goods they now make are supplied from Europe.

—New York Press.

# CURIOUS SKEKES.

Hundreds of people at Chicago will fall over each other to get a glance of the Gospel in the Syrian tale which never took an English copy of the New Testament.

# LOOKING AROUND.

St. Louis Globe-Democrat.—Mr. McKinley dropped casually into the White House yesterday, but he was in 1896 by directed by the White House like up his quarters there for a few years.

# RIOHS OF WORKINGMEN.

Indianapolis Journal.—The insubordinate right of every man to be as quiet as important as the insubordinate right to quit work. It is absurd to maintain the latter while denying the former. The non-Union man has the same right before the law as the Union man.

# IMITATING BUCHANAN.

Utica Herald.—President Harrison, accompanied by the American flag, encouraged around the fair dominion of our flag. In its genuine affectionate choice and adoption by the people of Hawaii. His successor is the first of our Presidents, since the flag and the Union it covers were assailed to the death, who has taken no part in the defending of the Union and the honor of its flag. The last Democratic President before him is remembered for nothing else than his indifference whether the flag was hoisted down or not.

# A DEMOCRATIC VIEW OF OLNEY.

Chicago Record.—Mr. Cleveland is a slow-going, if steady-paced, reformer. It is to be presumed that he intends to make good the pledges as to the "rigid enforcement of the law concerning trusts." If such be his purpose he does not disclose it, nor does he disclose the character of the man at the head of the law department. Attorney General Olney has not as yet acquired fame as the enforcer of trusts. On the other hand, he is called to by many ties that are not likely to be impaired by the assistance of the high office to which he has been called.

# PENDERS AMERICANS CONTEMPTIBLE.

Pittsburgh Press.—This is a country that produces politicians instead of statesmen. There is James H. Blount of Georgia, who was sent to Honolulu with power to do as he pleased, and the first thing he did was to pull down the American flag and order the United States marines aboard ship. This action should excite the indignation of the whole nation. Its effect is to bring the American flag and the American people into contempt, not only in the eyes of the residents of the Hawaiian Islands, but of the whole world.

# CLEVELAND'S COMMISSIONER.

Chicago Inter Ocean.—Mr. Blount does not seem to be acting as United States Commissioner, but as Mr. Cleveland's Commissioner to the Hawaiian Islands. The people of the United States are not more in love with the decrepit royalty of Hawaii than with the vigorous absolutism of Russia; rather less so, for in Hawaii there is a young and healthy democracy, informed of American ideas, that is in revolt, and successful revolt, against the feeble and useless monarchy. That young and beautiful democracy desires to affiliate the Hawaiian Nation with this Republic. Mr. Cleveland's "My Commissioner" is the first American to chide the Hawaiian democracy and to revive the drooping spirits of Hawaiian royalty.

# WASHINGTON AND LINCOLN.

The London News and Post seldom has anything kind to say for America, but it could not withhold an expression of disappointment at the fact that the rank of Ambassador was not first bestowed on the son of Abraham Lincoln. The News and Post says:

The independence of the United States was not formally recognized by England until 1783, so that there has been an American Minister accredited to the Court of St. James for just one hundred and ten years. The first bore the distinguished name of Adams, and subsequently that of the President. It is a matter of some regret that the first American Ambassador accredited to the Court of St. James was not the illustrious Lincoln, who ranks only second to Washington in the estimation of Englishmen as well as in that of his own countrymen. It is true that to have appointed Mr. Lincoln Ambassador would have been a graceful act on the part of Mr. Cleveland, and would have also been a grateful and to the millions of loyal Americans who honor Robert Lincoln both on account of his own eminent worthiness and the incomparable services of his illustrious father to the Republic and to mankind.

JOHN WALSH received Saturday a telegram stating that General G. A. Weisner, Grand Commander of the G. A. R., had appointed him as a member of his personal staff on the occasion of the Grand Encampment of the G. A. R. to be held in Indianapolis in September next. This is quite an honor, and all the more complimentary because it was voted by the Grand Army.

# GAINED THEIR LIBERTY.

EIGHT JAIL PRISONERS MAKE A BREAK FOR FREEDOM.

Four Are Afterward Captured—Robert McNeely, Turney, Knocked Down—Edith and Vaughn Among the Number.

There was much commotion in and about the County Jail, and on the streets and alleys adjacent thereto, at the noon hour Saturday. In fact the whole city was in more or less of an uproar.

The cause of the unusual uproar and disturbance was the escape of eight prisoners from the jail, three white and five colored. The whites were William Rittill and William Vaughn, famous locally as the check forgers, and Jeff Clayton, in for housebreaking. The colored men were Bob Warner, Larry, Charles Gant, grand larceny; William Brooks, house-breaking; William Smith, grand larceny, and Mark Middleton, shooting with intent to kill. The four latter were captured and returned to jail.

The escape was well planned and neatly executed. To still be in the credit for the job. His is considered by the officials, to have been the master mind which conceived and matured the delivery.

All those who gained their freedom were county prisoners, and were confined in the upper tier or story of the jail. They are allowed the freedom of the prison corridor during the day, but are not allowed down stairs where the city prisoners are kept. Behind iron bars and massive locks they were thought to be secure. But Edith, or some other mind with a mechanical turn, was equal to the occasion. Locksmiths have been brought in and made by one of the prisoners out of a spoon, which easily opened the big locks, two of them.

The opening of one of these locks was a feat which Jailer Kirk could not perform the day before with a key which was made to fit the lock. Locksmiths have been brought in and made by one of the prisoners out of a spoon, which easily opened the big locks, two of them.
